SPECIALISING IN QUALITY

Manhattan range

Our exclusive Manhattan range has been designed to operate without the traditional tilt-rod.

The operating mechanism is concealed within each panel, giving a clean, minimal, contemporary look. To open and close the blades, simply tilt one blade, and they all move in unison.

This unique range is available in three blade sizes: 64, 89 and 115mm. The Manhattan range can be finished in real wood, painted in any colour, and can be sandblasted or covered in faux leather, faux suede or fabric.

Shutters can also be made out of other solid woods such as Oak, Teak, American Black Walnut, Cherry and Maple.
